ABOUT ISDI SUMMER SCHOOL

ISDI's Summer School helps young minds discover their creativity and imagination through a unique program that combines engaging exercises and collaborative projects. It stimulates the students' capacity to think out of the box and challenges them to find tangible solutions to problems.

The program is designed to help participants find where their interests and skills lie and make better academic & career choices.

Through a transformative training process, the Summer School builds art and design skills, leadership, teamwork & confidence in young students. It shows the linear and lateral ways of solving problems and encourages them to channelize their enthusiasm and energies in a productive & creative direction.

They will also learn to work alongside highly motivated students to shape their portfolio and explore creative education options.

**Batches starting in
April, May, June & July 2021**

IMMERSE YOURSELF IN A DESIGN PROCESS AND ACHIEVE THE UNEXPECTED
